IN-ROW

AIR CONDITIONER

Series IR 3 Ton Unit

In-Row Configuration
for Compact Footprint
and Maximum Flexibility

Your Premier Source for
Racks, Cabinets and Solutions

COOLING MODES

- Water Cooled DX
- Glycol Cooled DX
- Air Cooled DX
- Chilled Water

Compact Footprint

The Series IR air conditioner's compact dimensions (12"x 42") minimizes floor space footprint.

Maximum Flexibility

The Series IR installs entirely above floor, which is ideal for low ceiling and non-raised floor cooling configurations.

Spot Cooling

Ideally suited to combat hot spots as a support to existing cooling systems.

Row Based Cooling

Positioned in the row, the Series IR performs well as both a stand alone air conditioner or in conjunction with our hot or cold aisle containment system.

Details

- Variable capacity operation
- Air cooled DX is ideal for incorporating into existing systems
- 900W power supply for 66% redundancy
- Dual A-B power feed
- SS condensate drain pan
- Condensate management
- Remote temperature sensor

Blower Motors

Energy efficient axial fans are easy to access and are hot swappable for zero down time replacement.

CONFIGURATIONS

- Rear to Front Flow
- DX in 410A

Control Module

Network compatible microprocessor controlled.

Filters

Aluminum washable 1" deep MERV 1 mesh filter. 20% efficiency.

12" wide x 42" deep x 83" tall
