sound
dampening

To reduce the transmitted noise levels of the server space, CableTalk can permanently adhere acoustic insulation to the inside of full size cabinets or wall mount cabinets.

SOUND DAMPENING

Please contact our head office to discuss your application

Insulation

The 1" thick acoustic insulation is manufactured from inorganic glass fiber bonded with a thermosetting binder and has a black mat bonded to the surface which faces the airstream.

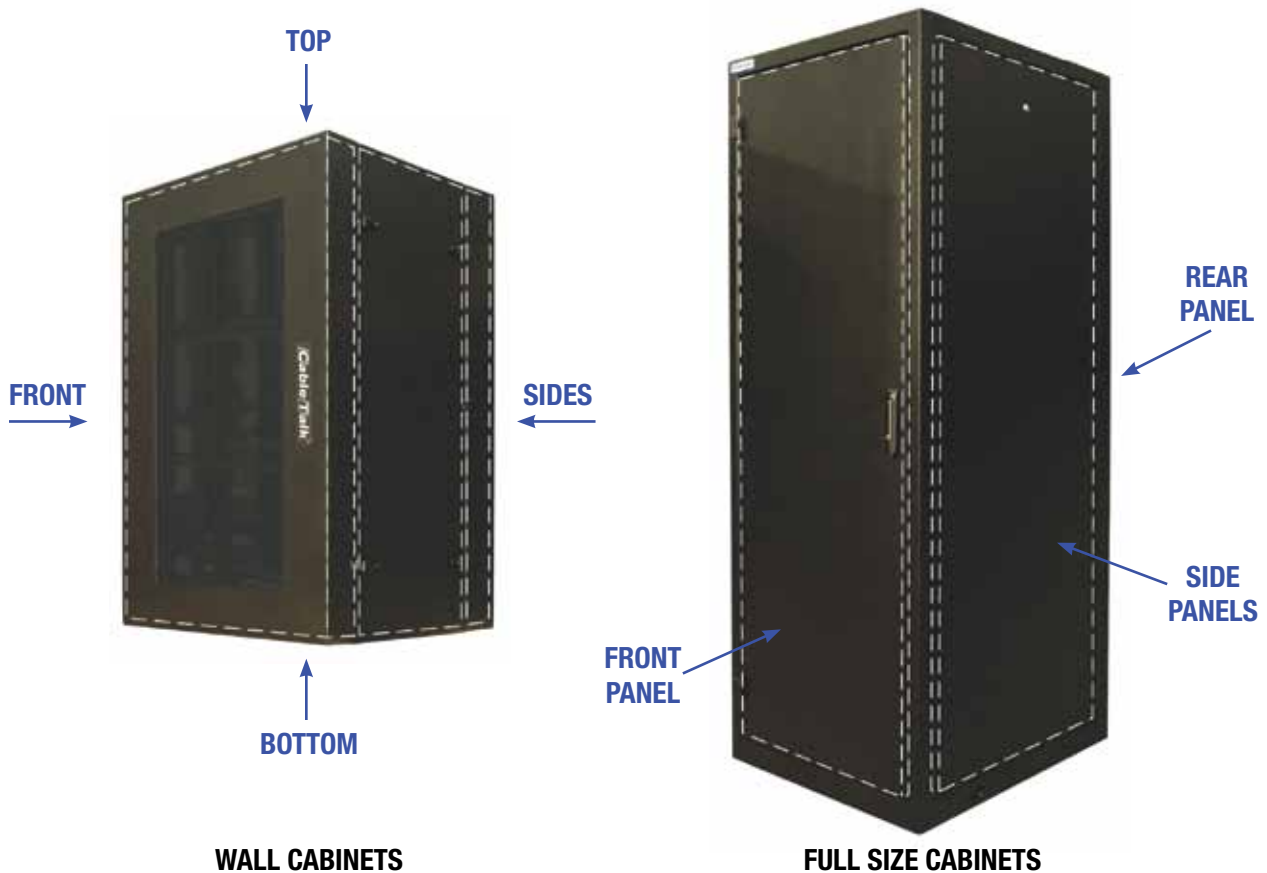

Installation

Permanently glued to the inside of cabinet as follows:

Full Size Cabinets – insulation is affixed to the inside of door and side panels.

Wall Cabinets – insulation is affixed to the inside of door, sides, top and bottom of cabinet.
